Treo Windows Mobile Prototypes

Prior to the announcement of the Windows Mobile Treo smart phone, popular technology blog Engadget was displaying photos of then unannounced Treo. Apparently, there were a few Windows Mobile Treo's available for purchase. One actually showed up on eBay last week, but the auction was quickly removed. Prototypes of the new Windows Mobile Treo were said to be running for a few thousand dollars. For that money, you could purchase a new Quad PowerMac G5.
