

Release set for early January

Friday, 16 December 2005

According to a report from msmobiles, the Treo 700 will be released in "early January".
News of Treo 700 Release Leaked

According to a report from msmobiles, the Treo 700 will be released in "early January". They have gleaned this information from a memo released by software distributor Handango. While there isn't a specific date for the release, the memo does site early January. There is a certain level of speculation. With CES (Consumer Electronics Show) starting January 5th, it's presumed this would be the ideal launch point for the 700w.

The leak apparently comes from a memo from software distributor Handango. The memo reads, In early January, Verizon will be exclusively launching the new Windows Mobile 5.0 Treo 700, and we need YOUR applications to feature on our Verizon sites, as well as in our new 5.0 PPC InHand catalog. Additionally, your WM 5.0 applications will be sold through several other channels, including Microsoft, Dell, HP, Alltel, and Sprint. If you have not already done so, please email windowsmobile@handango.com with the following information on your 5.0 applications:

- Application Name
- Product ID
- If the app is square-screen aware
- If OTA files are uploaded and ready for InHand

For additional information on making your application 5.0 aware, please visit: [Windows Mobile 5.0 Migration Guide](#).

Thanks go to msmobiles for the report.
