PicseL Viewer Update Available

PicseL has released an update to the PicseL PDF Viewer software. PicseL PDF Viewer lets you access full, native PDF documents directly from your smartphone, without having to convert or reformat content.

Version 1.1.1 includes optimized memory management for the Treo 700w smartphone to better support the viewing of large, graphically intense documents.

More information on how to install this free software update can be found at [Palm](#).
