How To Add WiFi to the Treo 750

Pocket PC Central has tutorial on how to add wi-fi to the Treo 750 using the Spectec SDW-822.  
How To Add WiFi to the Treo 750

Pocket PC Central has tutorial on how to add wi-fi to the Treo 750 using the Spectec SDW-822.

At the time of this guide, the Spectec SDW-822 is the only miniSDIO wi-fi card on the market. As the author notes, "This tutorial involves changes to the Windows Mobile registry. Registry editions should be made with caution. An error can render a handheld unusable". There you have it. Proceed with caution, but adding WiFi on the Treo 750 can be done.

via PocketPC Central by way of PalmInfoCenter

Sponsored link: Spectec SDW-822: Connect anywhere you have Wi-Fi access - at home, work, or on the go with Spectec's miniSD Wi-Fi Card. With the card in your Treo 750 you can connect to Wi-Fi networks to access the Internet, email, and corporate servers. \$89.95
